Who am I

I am a person who tries to work on himself, gain experience and constantly learn. I am curious and I like to try things on my own. I would like a good front-end developer, since that is the field I am interested in. Programming is my passion. My strengths are fast learning and purposefulness. My weakness is stubbornness. I am kind of an optimist and something between an extrovert and an introvert.

Education

2017–2020: **ESF MU Brno** – Master's full-time study
field: **Economics**. **Graduation:** January 2020, degree: Ing.

2014–2017 **ESF MU Brno** – Bachelor's full-time study
field: Economics. Graduation: 2017, degree: Bc.

Experience

Front-end developer at Brandmaster s.r.o. (2021/07 – present)

Job duties:

- Development of internal web applications and custom web apps for customers.
- Technologies: JS, CSS/SCSS, HTML, PUG, GIT, Angular, Gulp

UX/UI developer at Visitpro.eu (part-time) (2021/03 – present)

Job duties:

- Coding of UI elements, UX development, the overall styling of application.
- Technologies: SCSS, GIT, Blazor, Next.JS

Software tester at TwinSoft s.r.o (2017/11 – 2021/07)

Job duties:

- Manual and automated testing of a web application.
- Work with SQL database (queries, data management).
- Communication with clients. Cooperation during development – UX/UI, problem-solving.
- Presentation of the software to the clients. Writing methodological help for clients.

Hard skills

- HTML, CSS, JavaScript
- React, Angular, see [portfolio](#)
- SQL – basic queries
- English – C1/B2
- French– B2/B1

Soft skills

- **Team worker** – more heads know more
- **Effective communication** – speaking is silver...
- **Independence** – I solve problems by myself first
- **Fast-learner** – I can learn quickly
- **Creativity** – that is "playing intelligence"

More about me

Since I have always been interested in web development, I started to study this subject after my master's degree. At that time, I was still employed as a SW tester. After finishing courses for web dev (can be seen on my web portfolio), I found a part-time job as UX/UI developer in local company. A few months later, I found a full-time job as a front-end developer. And then I knew that I did not want to do anything else.
